

Discover Technologies to attend First SharePoint Summit held in Vancouver

Montreal, Monday, July 26, 2013--On October 28-29, 2013, the first two-day SharePoint Summit conference will be held in Vancouver. This is now a mature event, entering its seventh year. Year after year, the event has seen 25% annual growth, becoming the top professional gathering in the SharePoint space. This exclusive training and networking event is the only one of its kind in Canada.

Built by the community for the community, our board of directors, made up of high-profile subject matter experts in the SharePoint world (MVP, Gold Partner, ISV, Customer), will be heavily involved in preparations for the SharePoint Summit, especially training, Summit content and the SharePoint Summit Community site.

Built around the theme of Evolution, Innovation, Connection, the conference's 2013 edition will zero in on new developments. This will be the first Canadian SharePoint conference following the launch of the new, improved 2013 version of the SharePoint platform – always an eagerly anticipated release for the user community, because it only happens every three years.

"There's always plenty of excitement at this conference in years when Microsoft releases a new version of SharePoint. Every participant is eager to learn about the platform's new features and functionality, so they can make even better use of it to improve their productivity and that of their entire organization," said SharePoint Summit chairman Danny Boulanger. "This year, because Microsoft has launched Windows 8, the Surface tablet and Windows Phone 8, as well as SharePoint 2013, the conference will be especially content-rich for every user, from beginners to Super-Users. Our program of presentations and workshops will be stronger than ever," Mr. Boulanger added.

Vancouver SharePoint Summit 2013 will stand out from previous editions, thanks to new activities reflecting its exceptional vitality and relevance for the industry. The new SharePoint 2013 platform and its new features:

- SharePoint in the Cloud
- Innovative Business Solutions
- Keynote Speaker and SharePoint Expert Danny Boulanger
- More than 40 speakers, including some of the industry's best known SharePoint influencers and MVPs
- Case study workshops to spread SharePoint expertise grounded in experience
- Sessions for managers, information architects and project managers
- ShareLounge, where participants can network with their peers and leading-edge technology companies

The SharePoint Summit is open to any company, user or individual with an interest in the SharePoint platform. To get all the news as the event approaches, visit sharepointsummit.org/Vancouver
