**Discover Technologies' DiscoverPoint Named KMWorld's Trend-Setting Product of 2012**  
*Innovative Search Software, DiscoverPoint selected as a trend-setting product for the second time*

**WASHINGTON, Aug. 27, 2012 /PRNewswire/** -- Today Discover Technologies, LLC announced that they have been selected as a "Trend-Setting Product of 2012" by KMWorld Magazine. KMWorld is the 'leading information provider serving the Knowledge Management systems market,' and are responsible for 'covering the latest in Content, Document and Knowledge Management, informing more than 45,000 subscribers.'

Unlike other search technologies that require user adoption, manual tagging of documents and the creation of mysite profiles, DiscoverPoint is the only Expertise Location software that is completely automated. DiscoverPoint recognizes each KW's body of work conducted on a daily basis, and leverages that and other information to create a unique "digital footprint." One is created for each KW within an enterprise which enables DiscoverPoint to automatically deliver relevant colleagues and information relevant to the end users. This greatly enhances collaboration, increases productivity and decreases costs associated with searching for the right colleagues using traditional search methodology.

Representatives with Discover Technologies will be exhibiting DiscoverPoint live at the upcoming KMWorld Enterprise Search Summit in Washington, DC this October, 2012. Contact us today to learn more about DiscoverPoint and how it can save your organization valuable time and significant money while delivering the most precise and actionable data to your knowledge workers.

About Discover Technologies, LLC: Reston, VA based Discover Technologies, LLC is a unique software development and professional services company dedicated to delivering new and innovative enterprise class search solutions around information and expertise discovery.
