Business Applications

Forms and Workflow in SharePoint

Quickly build workflows in SharePoint using K2's drag-and-drop design tools. Wizards help you configure common SharePoint workflow scenarios, and designs can be easily shared, facilitating real-time collaboration with colleagues.

Enterprise Forms

K2's Customized SmartForms seamlessly integrate with Share-Point, giving you powerful forms that work within the SharePoint platform.

Business Process Accelerators

Kick start your solution with ready to use application templates covering common business needs allowing rapid application development.

Enterprise Integration

Integrate systems, data and connection points across the enterprise with K2 such as ERP, ECM, Data Warehouse, CRM, etc.
