- Food & Drug Administration (FDA) — Five-year single Awarded 3-2017 ($100M BPA) to provide Microsoft SharePoint, Enterprise Search, and Project Server implementation and support services
- Consumer Finance Protection Board (CFPB) — Five-year, multiple-award ($40M BPA) to provide web development, design, and programming support services
- Enterprise-Wide Deployments of Discover Access for SharePoint:
  - Department of Veteran Affairs (VA) — over 400K users
  - Health Resources and Services Administration (HRSA)
  - Centers for Medicare & Medicaid Services (CMS)
  - Securities and Exchange Commission (SEC)
  - Environmental Protection Agency (EPA)

(Deployments include SP 2010, SP 2013, and Office 365)

Discover Technologies Differentiators:

Discover Access for SharePoint

Discover Technologies offers a unique proprietary software solution that improves enterprise-wide collaboration by helping technology users easily perform collaborative tasks in SharePoint:

Field Advantages

➤ Field usability for SharePoint in low bandwidth environments

➤ Reduces SharePoint latency

➤ Fully functional mobile SharePoint experience

➤ Rapid deployment; no installation or changes required on client side

➤ Interface optimized for small form factor devices

➤ Platform and device agnostic

➤ Server-based software solution; nothing additional required on client side

Accessibility Advantages

➤ Makes SharePoint 100% navigable by keyboard

➤ Integrates with market leading assistive technology (JAWS, Dragon, MAGic, ZoomText)

➤ Consistent end user experience independent of device (desktop, laptop, smartphone, tablet)

➤ Instant Section 508 and WCAG 2.0 Compliance

Proprietary Accessibility Solutions

➤ Internally developed, proprietary solutions extend accessibility and usability to blind and visually impaired workers for SharePoint, Skype for Business and K2 smartforms

K2

Discover Technologies has the largest team of K2 Certified Practitioners in North America:

➤ Multiple DoD cleared K2 resources

➤ Multiple K2 masters

➤ Build forms and workflows from integrated content sources with little to no code
